

Usman Saeed

Web Developer/Python

+92-309-3755592 | usmanjutt3755592@gmail.com | Lahore, Pakistan

CAREER OBJECTIVE

Highly motivated and self-driven Computer Science fresh graduate (GCUF, 2022–2026) seeking an entry-level Software Developer or Web Developer role at a software house. Skilled in full-stack web development — HTML5, CSS3, Bootstrap, JavaScript, Python, Flask, and MySQL. Built 3 complete real-world projects entirely through self-learning: Nexus Solution College Management System (FYP), an IoT Agri Tech Web Platform, and a freelance client website — 100% self-built skills and projects. Ready to join, contribute from day one, and grow rapidly within a professional team.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Front-End Development: HTML5, CSS3, Bootstrap 4/5, JavaScript (ES6+), Responsive Web Design, Cross-Browser Compatibility

Back-End Development: Python, Flask, Flask-Login, Werkzeug Security, Flask-SQLAlchemy, REST API Integration

Database Management: MySQL, Relational Database Design, SQL Queries, CRUD Operations

Tools & Version Control: Git, GitHub, Visual Studio Code, Claude AI, ChatGPT (AI-Assisted Development)

Specialized Skills: IoT Web Integration, Real-Time Data Dashboards, College Management Systems

Soft Skills: Self-Motivated, Fast Learner, Problem-Solving, Attention to Detail, Team Player, Deadline-Driven

PROJECTS

Nexus Solution College Management System — Final Year Project (FYP)

2026

Self-Developed · Python · Flask · MySQL · HTML5 · CSS3 · Bootstrap 5 · JavaScript

- Implemented secure user authentication with role-based access control for three user types: Admin, Faculty, and Student.
- Developed full modules: student record management, course enrolment, faculty profiles, timetable scheduling, and announcement board using MySQL database.
- Deployed a fully tested, production-ready web application with responsive front-end (HTML5, CSS3, Bootstrap 5, JavaScript) — accessible on mobile, tablet, and desktop.

Agri Tech Navigate — IoT Web Integration Platform

2025

Self-Developed · Python · Flask · MySQL · Pillow · OpenMeteo Weather API · HTML5 · CSS3 · Bootstrap · JavaScript

- Built a real-time web dashboard that receives and displays live data streamed from physical IoT hardware sensors (temperature, humidity, soil moisture).
- Integrated OpenMeteo Weather API and stored historical sensor data in MySQL for trend analysis and reporting.
- Created interactive JavaScript charts for live sensor readings — delivered a fully responsive dashboard accessible from both mobile and desktop in the field.

Al Fareed Zari House — Client Business Website

2025

Freelance Project · HTML5 · CSS3 · Bootstrap · JavaScript

Built a fully responsive static website with design gallery showcasing Zari embroidery designs using HTML5, CSS3, Bootstrap, and JavaScript.

Integrated clickable social and location links: Instagram page, WhatsApp contact, and Google Maps store location — making it easy for customers to connect.

EDUCATION

Bachelor of Science in Computer Science (BS CS)

2022 – 2026

Government College University Faisalabad (GCUF) — Faisalabad, Pakistan

- Completing 4-year accredited BS Computer Science degree — graduating 2026.

- Final Year Project (FYP): Nexus Solution College Management System — built with Python, Flask, and MySQL (2026).

LANGUAGES

- Urdu — Native
- English — Proficient (Reading, Writing, Technical Communication)
